Review from milgard.com -

We have enjoyed our new windows and patio slider doors, and it is very easy to see the quality craftsmanship that has been put into these products. The windows and doors slide and lock easily and feel very secure when they are in the locked position. We would definitely purchase Milgard products again.

It's amazing how you can stand by the window with the sun beating down on them and there is no temperature change. The locking system is so simple and effective. By far the greatest investment we have made on our house.

Smart window design.

Our engineers are known for their industry-leading window designs that feature Milgard-patented technologies. Reducing places where metal can conduct heat or cold through the window is just one example of designing for thermal efficiency.

With the new Milgard windows my air conditioning bill is only a third of what it was. The new windows greatly add to the value, appearance and comfort of the house. I would, and do, highly recommend them as replacement windows.

Now I happily sit at my office with the window shades fully open and feel absolutely no temperature difference when the sun shines directly on me. They look great, open and close super-easily and really help out with the power bill. I would recommend Milgard to everybody looking to buy windows.
